## Product Data Sheet

**ALCOFIN IB 45**

**Anionic surfactant**

---

ALCOFIN IB 45 is Sodium di-isobutyl sulfosuccinate which is an extremely efficient wetting agent in high concentrations of electrolytes and highly hydrophilic in nature.

---

### **PRODUCT FEATURES**

- Alcofin IB 45 imparts good electrolytic and mechanical stability and reasonably high surface tension.
- It is extremely stable in concentrated electrolyte solutions for leaching, wetting, electroplating and dispersion applications.

### **COMPOSITION**

- Proprietary blend

### **TYPICAL PROPERTIES**

- Appearance : Clear Colourless to Pale Yellow Liquid
- Solid matter (%) : 45.0 ± 2.0
- 1% pH : 5.0 – 7.0
- Active matter (%) : 40.0 ± 2.0
- Density @30°C : 1.11 – 1.13

### **SPECIAL FEATURES**

- ALCOFIN IB 45 imparts high surface tension and good mechanical stability to latexes.

### **APPLICATION**

- ALCOFIN IB 45 is used as Surfactant for Foam boosting.
- It is used in emulsion polymerization and stabilization of styrene, styrene butadiene and other styrene based systems

## **HANDLING AND STORAGE**

- Storage stability : At least 12 months.
- Storage and transport : Storage and transport NOT UNDER 30 °C and NOT ABOVE 40 °C.
